

MOCS 2026 - The Merck Organic Chemistry Symposium

Thursday, 3 December 2026 - Friday, 4 December 2026

Scientific Programme

The scientific program will include invited lectures, a series of oral communications presented by experienced Ph.D. students and postdoctoral fellows, and a poster session. To stimulate interactions between academic and industrial chemists, and to allow Ph.D. students and postdoctoral fellows to inquire about job opportunities, a session of flash interviews will be organized with representatives of chemical and pharmaceutical companies.
